

**HOUNSFIELD
BOILERS**

*Fire valves engineered with the installer in mind
2 - 35 mtrs. capillary lengths.*

**Domestic Oil Fired Boilers
Designed & Made in Britain**

www.hounsfieldboilers.co.uk

Order a fire valve with your boiler! We'll pre-assemble it to the oil filter as shown in the photo

Photo shows valve assembly supplied with wall mounted boilers.

Features at a glance.....

- ☑ Broad range of capillary lengths, 2 to 35 metres.
- ☑ Just two joints to be made as compression fittings are integral to the valve body.
- ☑ Oil line inserts included, provide extra support and leak free joints.
- ☑ No "nuisance" trip-outs, with oil used as the expansion medium, it providing greater stability than gas which is more commonly used.
- ☑ Manufactured in the UK.

Part No.	Temp. range	Capillary length mtrs.
